

Video 4 Example Product 2

In this video, I'll be showing you another example of how this system works.

Let's dive right in...

Okay, so, I'll work from the list I provided and will start with Watches.

First, I'll go to Ebay.

Now, I'll click on the "Advanced" link to the right of the blue Search button.

I'll enter my keyword "watches" in the search box at the top.

Next I'll select price and show items priced from 10.

Okay, Under "Buying format" you'll want to select "Buy It Now".

Then, under "Condition" you'll want to select "New."

Now click "Search"

Scroll down and what we are looking for is a higher number of sales. See here, this "Mens Fashion Luxury Watch Stainless Steel Band Sport Analog Quartz Wristwatches" have sold 226. So, for this item, instead of Amazon, let's use a different site. Let's use Walmart. Walmart's website can be a goldmine for really cheap products. Oftentimes, it can be better than Amazon. So if you check Amazon and you're not seeing any good deals, try Walmart. Targets not bad either. I don't use Target that much, but I will if I

So, here's Walmart.com. Let's copy the text from eBay and paste it into the Walmart search bar.

Okay, right at the top, here's an offer for Mens Wrist Watch Fashion Stainless Steel Luxury Sport Analog Quartz Clock." Now, I don't believe that this is the same watch. No, the watch on eBay is Chenxi and the Walmart watch is Orlando. But, they are very similar in style. So, my guess is that they would sell relatively the same. So you could purchase some of these from Walmart and then list them on eBay for 2 to 3 times the price and make a nice profit.

It's items like this that I like because shipping isn't going to cost very much. You could even increase the price slightly to account for the shipping cost.

And also, delivery on this is free, so that's an added bonus. Plus, I think if I click on the item name it will take me back to the product page and I should be able to buy some more. Yeah, I can. Great! So 25 of these watches would cost me \$125.50 and if I can sell them for \$15 - \$20 I could make \$375 to \$500. After fees I'd still be looking at a nice profit.

Okay, well that's it for this video. In the next video we will find another product example to demonstrate the power of this system for making money on eBay. I'll see you there.
